Liouville s theorem complex analysis Wikipedia

December 13th, 2018 - In complex analysis Liouville s theorem named after Joseph Liouville states that every bounded entire function must be constant That is every holomorphic function f for which there exists a positive number M such that $|f(z)| \leq M$ for all z in \mathbb{C} is constant Equivalently non constant holomorphic functions on \mathbb{C} have unbounded images The theorem is considerably improved by Picard s little theorem

Optical Surfaces Newport
