January 12th, 2019 - Let us focus on four facts from this high dimensional theory 1 Simply connected smooth manifolds of dimension 5 or more are diffeomorphic if they are A cobordant 2 The homotopy type and Pontrayagin classes of a compact simply connected manifold of dimension 5 or more determine the smooth structure up to a finite number of possibilities

January 7th, 2019 - The Geometry of Four Manifolds By Donaldson Kronheimer Author It turns out that the classification up to diffeomorphism of four manifolds is very different from the classification of unimodular forms and that the study of this question leads naturally to the new Donaldson invariants of four manifolds
